

Soluzioni espositive per il *FAI DA TE*
Integrated display solutions for *DIY*

SIDAC

METALSISTEM[®]

Creatività ed innovazione sono sempre stati elementi che hanno contraddistinto METALSISTEM sin dagli inizi. Con il marchio SIDAC, METALSISTEM si colloca nel settore dell'architettura dell'arredo di spazi commerciali, offrendo un'ampia gamma di soluzioni avanzate dai punti vendita più piccoli fino ai grandi ipermercati.

Da una vasta gamma di attrezzature per l'esposizione professionale delle più svariate categorie di prodotto, fino alle barriere cassa, ogni cosa è studiata nel dettaglio, in modo da valorizzare la scelta, incoraggiare l'acquisto e facilitare il pagamento; si creano così soluzioni per aree di vendita funzionali e piacevoli.

Versatilità ed eleganza degli accessori, finiture di qualità, concetti di design di interni innovativi, un ambiente spettacolare e sistemi di illuminazione sviluppati per mettere in evidenza ogni articolo.

Materiali di qualità certificata nelle aree heavy duty e di stoccaggio di materiali ingombranti; una vasta scelta di ripiani e fondali concepiti per le più diverse esigenze espositive.

Nessun dettaglio è lasciato al caso, per garantire sempre la massima affidabilità delle attrezzature e l'utilizzo migliore di qualunque area di vendita.

Creativity and innovation have always been qualities that have distinguished METALSISTEM from its inception. With the SIDAC brand, METALSISTEM has positioned itself in the retail sector, offering a wide range of advanced solutions destined for anything from sales outlets to the larger scale hypermarkets.

From a wide range of professional display equipment for countless product categories to checkout barriers, all facets of the sales floor are scrutinized to enhance choice, encourage purchase and facilitate payment. Providing solutions for attractive and functional sales areas.

Versatile and elegant accessories, quality finishes, innovative interior design concepts, spectacular environments supported by lighting systems developed to highlight every article.

Materials of certified quality, robust structures for areas dedicated to heavy duty and bulky items; a wide range of display shelving and back panels designed for far reaching display needs.

No detail is overlooked enabling the optimization of sales surface utilisation while guaranteeing the reliability of the display equipment.

METALSISTEM

METALSISTEM, leader europeo nella produzione di scaffalature industriali e commerciali, è in grado di proporre soluzioni integrate studiate specificatamente per il settore FAI DA TE – DIY applicato alla grande distribuzione organizzata.

SUPERBO 4/5/6

METALSISTEM

The broad reach of the METALSISTEM production capacities, spanning for shop front to industrial shelving solutions, makes it perfectly suited to the unique demands of the hardware sector - DIY applied to the large surface retail environments.

**EUROSCACCO
SYSTEM 25**

LA SCAFFALATURA SETTORE FAI DA TE

La scaffalatura per negozi FAI DA TE è stata concepita per rispondere a diverse necessità espositive per una gamma di prodotti varia per dimensioni ed utilizzo.

METALSISTEM sceglie di integrare la propria linea porta pallet SUPERBO con la scaffalatura commerciale EUROSCACCO PASSO 25 per proporre un display perfettamente idoneo per questa tipologia di prodotti.

Nella linea porta pallet SUPERBO METALSISTEM esprime la massima flessibilità ed efficienza espositiva garantendo un elevato standard di portata e sicurezza.

La modularità e la vasta gamma di accessori della scaffalatura EUROSCACCO PASSO 25 si rivelano invece la soluzione ideale per lo sviluppo di complementi per l'arredo di negozi FAI DA TE.

L'ottimizzazione degli spazi trova piena corrispondenza nell'utilizzo del modulo passo 1000 rendendolo il modulo standard per eccellenza.

DIY SHELVING

The diverse dimensions and applications of hardware products have demanded the conception of a tailored range of shelving specifically developed for the DIY sector.

METALSISTEM has integrated the SUPERBO pallet racking series with its EUROSCACCO PITCH 25 shelving to offer a seamless display solution for hardware products.

METALSISTEM's SUPERBO series offers outstanding flexibility and showcasing efficiency guaranteeing the highest safety and load bearing capacity standards.

A modular design along with a vast array of accessories available in the EUROSCACCO PITCH 25 represent the perfect platform with which DIY store requirements can be personalised

The 1000mm module allows the surface area to be maximised.

SVILUPPO ELEMENTI SCAFFALE TIPO FAI DA TE

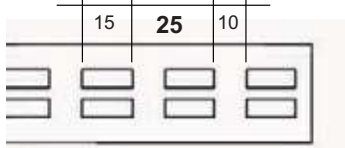

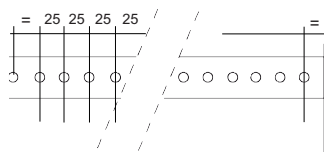

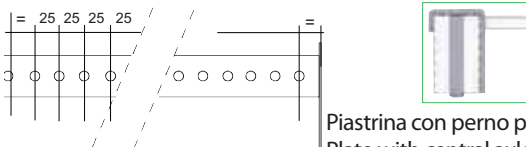

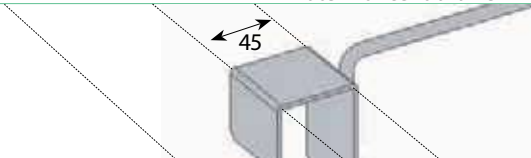

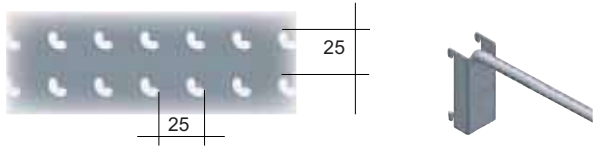

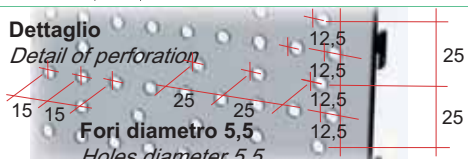

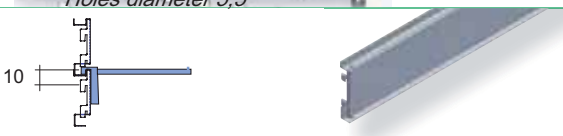

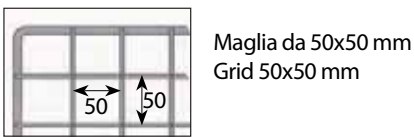

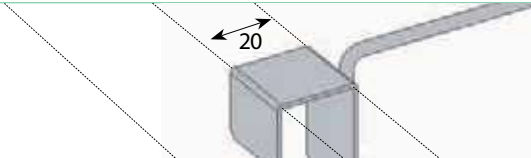

Per tutte le indicazioni tecniche necessarie e per l'ordine degli articoli della scaffalatura EUROSCACCO si rimanda all'utilizzo del catalogo tecnico SISTEM 25, mentre per la linea SUPERBO sono state selezionate alcune varianti specifiche del settore FAI DA TE; per ulteriori diversificazioni e/o proposte in merito vi preghiamo di fare riferimento al Manuale Tecnico SUPERBO 4-5-6 o al nostro ufficio commerciale.

DEVELOPMENT OF DIY SHELVING MODULE

All the supporting technical information required to understand and place orders is available in the EUROSCACCO SISTEM 25 technical catalogue, while the SUPERBO range orders can be placed by selecting from a range of specifically developed hardware sector modules. Please refer to the SUPERBO 4-5-6 technical manual or to our technical office for variations from the standard modules.

VERNICIATURA	PAINTWORK
I materiali metallici da noi forniti sono verniciati con polvere termoindurente a base di resina epossipoliestere che è stata sottoposta a collaudo dal Registro Italiano Navale (R.I.N.A.) con il seguente responso: "Materiale a limitata attitudine a propagare la fiamma con caratteristiche autoestinguenti e non facilmente infiammabile". I prodotti METALSISTEM vengono forniti verniciati con polveri epossipoliestere certificate e completamente esenti da metalli pesanti. L'applicazione delle polveri avviene in un impianto automatico a ciclo integrale. Il rivestimento così ottenuto garantisce al prodotto elevata resistenza all'abrasione ed alla corrosione da alcali ed acidi.	Metal surfaces supplied by METALSISTEM are powder coated with thermohardening powder made of an epoxypolyester resin which has been tested by the Italian Naval Registry (R.I.N.A.) with the following results: "Material with limited attitude to flame propagation with self extinguishing characteristics and not easily inflammable". All powder coated products use only certified epoxypolyester powder and are free of heavy metals. The powder coating is applied in a completely automated plant in a single process. Coating applied in this way therefore guarantees high resistance to abrasion and corrosion from alkalis and acids.
ZINCATURA	GALVANISATION
Per la realizzazione degli elementi strutturali zincati METALSISTEM impiega acciaio strutturale alto resistenziale zincato a caldo in continuo denominato S350GD in conformità a quanto previsto dalla UNI EN 10346:2004. Il rivestimento di zinco è ottenuto con un processo in continuo tipo SENDZIMIR. L'attività chimica tipica dello zinco prevede la formazione di strati insolubili e compatti e ben aderenti al substrato metallico, in grado di creare un effetto barriera contro l'ambiente circostante.	The METALSISTEM racking products use S350GD high tensile steels following the UNI EN 10346:2004 standards. The galvanisation is applied directly to the coils using the SENDZIMIR process. Galvanisation is an applied layer of zinc over the steel surface which forms an insoluble compact layer that is well bonded to the metal substrate. This creates a very effective barrier against the environment.
NOTE	NOTES
1. Le dimensioni riportate a catalogo devono essere considerate indicative. 2. Per maggiori informazioni sui prodotti contattare gli uffici tecnici METALSISTEM. 3. METALSISTEM S.p.A. nella ricerca di miglioramento della propria produzione si riserva, in qualsiasi momento e senza preavviso, di modificare le caratteristiche dei propri prodotti.	1. Dimensions given in this catalogue are indicative only. 2. For further information please contact METALSISTEM technical office. 3. METALSISTEM S.p.A., as part of its continuous effort to improve the quality of its production, reserves the right at all time and without notice to modify the details of its own products.
CERTIFICAZIONE	CERTIFIED
Per quanto riguarda le certificazioni di sistema, METALSISTEM è certificata ed opera secondo la norma UNI EN ISO 9001 fin dal 1997, mentre ha conseguito la certificazione del proprio sistema ambientale secondo la UNI EN ISO 14001 nel corso del 2009. Inoltre nel 2009 METALSISTEM è stata riconosciuta come Operatore Economico Autorizzato (AEO full) dall'Agenzia delle Dogane. Nel luglio 2010 METALSISTEM è stata accreditata presso il servizio tecnico centrale come centro di trasformazione secondo il DM 14 gennaio 2008 "Norme tecniche delle costruzioni".	METALSISTEM was UNI EN ISO 9001 certified in 1997, additionally in 2009 METALSISTEM obtained the UNI EN ISO 14001 environmental certification as well as having been recognised as an Authorized Economic Operator (AEO full) by the Italian Customs Agency. In July of 2010 METALSISTEM obtained it's certification as a processing centre under the Italian decree of the 14th of January 2008 "Technical Rules of Construction".

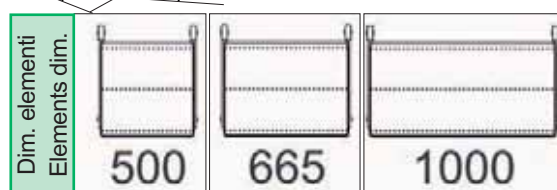

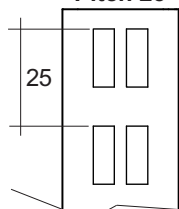

ISTRUZIONE PER LA COMPILAZIONE DEL CODICE PRODOTTO		INSTRUCTIONS FOR THE USE OF THE COLOUR CODES
I codici dei prodotti verniciabili presentano un doppio trattino (- -) sul catalogo, per esempio: AA03895. - - (parte da completare) È possibile comunque scegliere una finitura disponibile dalla tabella colori presente sul Catalogo EUROSCACCO SYSTEM 50 nelle classi A B C. Per esempio nella classe "A" abbiamo la finitura standard "bianco Sidac" con codice "01". Aggiungere la sigla colore al codice prodotto dopo il punto sostituendo le barre generiche. Codice completo: AA03895.01		The codes in the catalogue with the double dash (- -) represent codes that can be powder coated. For example: AA03895. - - (part to be completed) It is still possible to choose from a range of EUROSCACCO SYSTEM 50 standard colours from the class A, B or C colour chart. For example the "A" class is used when applying the SIDAC standard white with the code "01". Add the colour code after the full stop. Complete code: AA03895.01
ACRONIMI UTILIZZATI NEL CATALOGO		ACRONYMS USED IN THE CATALOGUE
P25	Prodotto che si aggancia a scaffalatura EUROSCACCO Passo 25 mm Item to be connected to EUROSCACCO Pitch 25 mm	
ABF	Accessori per aggancio alla barra in tubo con foratura solo superiore a passo 25 mm Accessories to be connected to a tube bar with upper perforation pitch 25 mm	
ABFP	Accessori per aggancio a barra in tubo con foratura passante a passo 25 mm Accessories to be connected to a tube bar with passing holes pitch 25 mm	 Piastrina con perno passante Plate with central axle
